

# Ergonis Releases PopChar X 8.6

By Peter Baldwin

Friday, October 4, 2019

**[PopChar X](#) Improves user experience and is now notarised by Apple**

**PopChar X 8.6** for Mac is a utility program that quickly lets you access all kinds of special characters and allows for the convenient addition of them to any document. No matter what font you're using or which character you need, you'll find it quickly inside this handy app.

It requires Mac OS X 10.6 or newer and is recommended for macOS Mojave (10.14).

## **What I like about this app-**

**Accessibility:** You can access this app at any time by clicking the tiny **P** icon in the upper left-hand corner of the screen. There is also an option to configure a hot key if you prefer, making it easy to access all of the special characters contained in this app at any time.

**Favourites List:** You can add any characters you use with regularity to your Favourites List for even quicker access. Creating this list is straightforward, and it means you won't have to search through all kinds of other characters to find the ones you're looking for.

**Font options:** This program will auto-detect the fonts you're using so you can find the available special characters quickly. You can also use it to do a reverse search to determine which fonts support a certain character so you know which one to use ahead of time.

## **Warning to New Users-**

This app contains a lot of information and may initially be a bit overwhelming for new users. However, once you familiarise yourself with the interface and start using some of the characters, it will become manageable.

## **Bottom line:**

PopChar X makes allows you to access all kinds of special characters, no matter what type of document you are working on in a quick and convenient manner. Once you set up your Favourites List you will find what you're looking for very quickly. Also you have the ability to set up hot keys to give you quick access to all program features.

## **Purchasing Options:**

A free trial version is available on the [website](#) with some characters disabled. It costs EUR 29.99 to buy.

## **About Ergonis Software:**

[Ergonis Software](#) a privately held company founded in 2002, is headquartered in Perg, Austria. They develop ergonomic and intuitive software that boosts the productivity of Mac and PC users.

## **I highly recommend PopChar X 8.6 to our members.**

It does not clutter my desktop, is always immediately available when I need it and it has never failed me when I am looking for a special character.
